The solar panel systems to heat hot water installed in Catalina have given issues which have been picked up through servicing and a number of repairs issued for a variety of items. The original installation contractor and their subcontractor will have been onsite carrying out repairs and our planned maintenance servicing contractor will also have been onsite. The servicing certification paperwork indicates that the systems are operating	

	correctly. This will be reviewed on an annual basis.

	Page 7, item 11- Fire Safety. IMP advised that ACHA has no properties that are classed as high rise flats and none of our properties have the same cladding that was on the flats at Grenfell Tower, the cladding we have used is nonflammable. IMP advised that any elderly tenants in top floor flats can go on the transfer list to be moved to lower flats. She also advised that we are putting sprinkler systems into our Sheltered Housing complexes and that they will still use the stay put policy due to age and mobility issues.
